Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Status of Claims

Claims 43, 44 and 46 were amended in the amendment filed on 28 October 2004. Thus, claims 43-46 are again presented for examination on the merits.

Response to Arguments

Applicant's arguments with respect to claims 43-46 have been considered but are moot in view of the new ground(s) of rejection.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 43-46 rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

As per claims 43 and 46, the phrase "changing the key for every time until changing the key" renders the claim indefinite. Applicant's amended terminology of changing the key for every time until changing the key fails to particularly point out and distinctly claim applicant's intended limitation as to the claimed invention.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for

patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 43-46 are rejected under 35 U.S.C. 102(e) as being anticipated by Blatter et al. (hereinafter Blatter), U.S. Patent 5,933,500.

As per the following claims, Blatter discloses:

Claims 43 and 46 (Currently Amended): An encrypted data transmitting method/computer readable medium comprising the steps of: encrypting data by using a key; transmitting the key and information indicating a time until changing to a next key to a receiving side; transmitting information for decoding the encrypted data to the receiving side, in accordance with a request from the receiving side; executing transmitting of said information for decoding the encrypted data and recording a watching and listening time obtained by integrating the time until changing the key; changing the key for every time until changing the key; and charging on the basis of the recorded watching and listening time (column 6, line 5-column 8, line 7; figures 1-4 and associated text).

Claim 44 (Currently Amended): A method according to claim 43, wherein the request from the receiving side is issued before the time until changing the key elapses (column 10, line 37-column 12, line 16).

Claim 45 (Previously Presented): A method according to claim 43, wherein the information for decoding the encrypted data is a key which data is encrypted (columns 13-14).

Examiner has pointed out particular references contained in the prior arts of record in the body of this action for the convenience of the applicant. Although the specified citations are representative of the teachings in the art and are applied to the specific limitations within the individual claim, other passages and figures may apply as well. It is respectfully requested from the applicant, in preparing the response, to consider fully the entire references as potentially teaching all or part of the claimed invention, as well as the context of the passage as taught by the prior arts or disclosed by the examiner.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
